DASHBOARD LICENCING

PANDEM-2 OPEN SOURCE

CLARISOFT, A MODUS CREATE COMPANY, TEAM

TABLE OF CONTENTS

1. INTRODUCTION

PURPOSE OF DOCUMENT

This document primarily aims to clarify the licencing mode of the dashboard source code written and distributed on GitHub by Clarisoft, a Modus Create[1] company.

SCOPE OF DOCUMENT

The scope of this document is to clarify any issue related to the open-source aspects of actual code delivered and deployed on GitHub as a part of the PANDEM-2 EU project[2].

PANDEM-2 SOURCE CODE, AN OPEN-SOURCE SOFTWARE

We respect and consider the full specification of open-source software as described and explained in reference[3].

Also, in the context of these considerations, we agreed with all partners specified as a legal part of the PANDEM-2 EU project to release the advanced prototype we created on GitHub using the specific open-source defined by the cc or creative commons open-source licencing with the code CC BY 4.0[4].

[4] https://creativecommons.org/licenses/by/4.0/

PANDEM-2 SPECIFIC TEXT INSERTED INTO EACH CODE FILE

The text we distribute and insert as a comment at the beginning of each code file is:

"

Copyright <your name, date>, licensed under the EUPL-1.2 or later.

This open-source code is licenced following the Attribution 4.0 International (CC BY 4.0) - https://creativecommons.org/licenses/by/4.0/.

Following this, you are accessible to:

Share - copy and redistribute the material in any medium or format.
Adapt - remix, transform, and build upon the material commercially.

Remark: The licensor cannot revoke these freedoms if you follow the license terms.

Under the following terms:

Attribution - You must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so reasonably but not in any way that suggests the licensor endorses you or your use.

No additional restrictions - You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits." [5]

The text approved after the internal Modus Create validation (Mathieu Boespflug (VP Open Source)) is:

"Copyright <your name, date>, licensed under the EUPL-1.2 or later. This open-source code is licensed following the Attribution 4.0 International (CC BY 4.0) - Creative Commons — Attribution 4.0 International — CC BY 4.0. Following this, you are accessible to:Share - copy and redistribute the material in any medium or format.
Adapt - remix, transform, and build upon the material commercially.Remark: The licensor cannot revoke these freedoms if you follow the license terms.Under the following terms:Attribution - You must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so reasonably but not in any way that suggests the licensor endorses you or your use.
No additional restrictions - You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits."

---

2. CONCLUSIONS

All consortium partners who signed the Grant Agreement document have chosen to deliver their results using the same open-source agreement.

The specified copyright text will be inserted at the beginning of each code file.
